Work Experience

Program Manager Assistant, NC State Carmichael Facility, Raleigh, North Carolina — Aug 2025 - present

- **Managed operations and risk compliance for a portfolio of 52+ clubs**, acting as a direct extension of professional staff to oversee game-day execution, safety protocols, and cross-functional team coordination.

Software Engineering Associate, Amdocs, Pune, Maharashtra — Aug 2023 - Jul 2025

- Led stakeholder alignment for roadmaps, user stories, and OKRs in Azure, resulting in a **25% increase in sprint velocity** and the successful delivery of 3 high-priority product pillars within a 6-month timeframe.
- Spearheaded **KPI-led product development** using Agile and Scrum, utilizing JIRA to improve delivery predictability and maintain a **90%+ Sprint Success KPI** across the product roadmap.

Software Developer Intern, ECBEE Innovations Pvt Ltd, Chennai, Tamil Nadu — Nov 2022 - May 2023

- Owned project features from concept to launch, translating user requirements into responsive prototypes and front-end interfaces, wireframes and web development, improving UX and contributing to **$480K in projected revenue**.
- Oversaw cross-platform mobile app development using Capacitor API integration and CI/CD pipelines, **reducing release cycles by 25%** and expanding market reach across Android and iOS.

Data Analysis Intern, Dreams Clues, Delhi, India — Apr 2022 - May 2022

- Supported project strategy by analyzing market trends, competitor data, and customer behavior using Python and Power BI and SQL, **accelerating data-driven decisions by 15%** and informing roadmap planning.
- Leveraged Power BI to visualize user feedback and research data, driving product iterations that **increased User Satisfaction (CSAT) by 20%** within two fiscal quarters by using continuous user feedback analysis and enhanced stakeholder visibility.

Projects

AI Powered College Application Assistant: (Link)

- Created and coded an experiential, **game-based AI curriculum** and slide deck demonstrating real-world AI management trade-offs and **prompt architecture** for high schoolers.

EEG Analysis: (Link)

- **Engineered an end-to-end machine learning pipeline** using Python, TensorFlow, and Scikit-learn to process raw neurological datasets, achieving **98% classification accuracy** in decoding cognitive states from biometric signals.

Medical Note De-identification

- Developed a **BERT-based NLP** solution and MLOps pipeline for automated **PHI detection**, achieving 99% accuracy in de-identifying clinical notes and reducing manual data privacy compliance audits by 60%.

PresentSir – Alumni Networking Platform: (Link)

- Directed the ideation to execution, sprint planning, and stakeholder alignment for a networking platform as Project/Product Manager and Lead Developer, utilizing **GenAI (ChatGPT)** to build scalable backend services and a secure chat system that achieved **100% KPI attainment** for all feature requirements.

Certifications

Certified Scrum Product Owner (CSPO) - Scrum Alliance
Aha! Product Management Professional Certificate

Leadership

Zealous Community & Events Host — Oct 2023 - Jul 2025

- Hosted community-driven conferences and discussion groups for 60+ participants, including an international forum in Malaysia, focused on fostering mentorship, inclusive community-building, and cross-cultural collaboration.

Centre Lead and PR & Design, ANOKHA-NGO, Vellore, Tamil Nadu — Dec 2019 - Aug 2023

- Managed 15+ volunteers to deliver weekly educational sessions for underprivileged students while coordinating all logistics and stakeholder reporting. Leveraged impact metrics, Critical thinking and strong written and verbal communication to present the organization's mission to sponsors, ensuring continued support and alignment.

School & College Leadership

- Served as Class Prefect and Event Head at Bishop Cotton Boys' School, organized the nationwide Synchronize 2018 Science and IT Fest, and led department-level mathathons and hackathons at VIT.
